## The latest installment in the LaserMax CenterFire Laser Series

**August 19, 2016 (Rochester, NY)** - Introducing the newest addition of the CenterFire laser series by LaserMax. The CF-SHIELD-45, for the new Smith & Wesson M&P 45 SHIELD.

As an essential sighting tool for training, concealed carry, and home defense, the *CF-SHIELD-45* projects a vivid red aiming point downrange. This is the perfect complement to Smith & Wesson's new M&P Shield 45 pistol. Rounded and blended to ensure a smooth draw, the *CF-SHIELD-45* mounts to the frame without permanent alteration and has a tactical design that matches the style and contour of the gun. It also offers ambidextrous activation to accommodate both right and left-handed shooters along with programmable pulse and no pulse modes. Most operators report immediate improvement to hit ratios after installing a LaserMax CenterFire laser sight. The *CF-SHIELD-45* sits just under the bore for pinpoint accuracy. The user can install in minutes. Protected by a 5-year warranty, *CF-SHIELD-45* is priced for every shooter's budget at just \$149. LaserMax is now accepting pre-orders and shipping the first week of September.

- Tough reinforced nylon design offers superior integration with firearm frame
- Easily programmable for steady or high-vis pulsed beam
- Controlled activation to promote firearms safety
- 10 minute automatic time-out prevents inadvertent battery drain
- Ambidextrous TAP ON/TAP OFF switch reinforces safe firearm handling
- Fully adjustable for windage and elevation
