## **LASERMAX ANNOUNCES MANTA-RAY, THE FIRST EASY SNAP-ON WEAPON LIGHT**

January 13, 2016 (Rochester, NY) – In an exciting collaboration with Manta Defense, LaserMax has developed a rugged, low profile Weapon Light for duty and protective use. Emitting 140 lumens of groundbreaking Mint Green LED light, Manta-Ray LMR-M offers vital target identification and illumination capabilities while permitting rapid mounting across a host of platforms by way of the combat-proven Manta rail connection.

A situationally-adaptive lighting system, Manta-Ray easily snaps on and off the firearm rail without need for tools, levers or clamps. Enhanced for service longevity without degradation, the light is powered by a state-of-the-art rechargeable battery with a 1-hour constant runtime. For more reflexive staging on long-guns and tactical weapons, Manta-Ray can also be run with LaserMax's optional Remote Activation Switch (LMS-RAS). Other unique features of the Manta-Ray include a variable power output, constant versus momentary activation and programmable lockout to maintain control and light discipline.

Scheduled to make its debut at SHOT Show 2016, Manta-Ray LMR-M will be available this February through fine sporting goods retailers everywhere with an MSRP of \$219. The ideal complement to any Modern Sporting Rifle (MSR), Manta-Ray will also be offered as an Infrared (IR) illuminator for use with night vision devices. Priced at \$265, LMR-IR projects 340mW of IR light, making it a worthwhile companion to the most affordable ruggedized Class-1 IR laser available, the LaserMax LMS-UNI-IR-RVP.
