3. Insert one (1) CR2 Lithium battery in the direction indicated inside compartment.
4. Insert battery cover ensuring cover tab seats into grip housing slot (Figure 3).

# CLEANING & MAINTENANCE

After repeated fire, your light lens may become clouded with powder residue. For best results, it is recommended that the light lens be cleaned along with your firearm after each use. To clean, follow these steps:

1. Keep firearm pointed in a safe direction.
2. Confirm light is off.
3. Dampen the end of a cotton swab with isopropyl alcohol.
4. Apply dampened swab to light lens and polish in a small circular pattern. Be sure to clean around the edges of the lens.

**WARNING:** Firearm should be cleaned and lubricated exactly as directed in the Owner's Manual. Excess lubricant can interfere with the proper function of both the firearm and the Lightning Laser. LaserMax components should never be submerged or flushed with cleaning solvents. Failure to adhere to these guidelines may cause damage and void the factory warranty.
