

FOR IMMEDIATE RELEASE

LaserMax Products wins 2017 Brilliance Award for Best Compact Laser from OpticsPlanet

Rochester, NY – October 17, 2017- OpticsPlanet, Inc., the leading optics retailer and a prominent information resource, has announced that the LaserMax Micro-2-G has won the 2017 Brilliance Award for best compact laser.

The Micro-2-G is the newest generation of the popular Micro laser system and is now better than ever. Less than an inch in length and weighing only half an ounce, the Micro II™ is remarkably small yet delivers the strength and durability necessary to withstand the shock of repetitive recoil while holding zero, round after round. Also notable are its convenient Quick Change Battery Hatch™ and automatic time-out after 10 minutes which prevents inadvertent battery drain.

“The Optics Planet Brilliance awards are a distinctive honor within the shooting sports community and LaserMax is thrilled to have another great product selected as a winner,” said Jay Duncan Director of Marketing for LaserMax Products. “We value our relationship with Optics Planet tremendously and thank them for the selection. This award is a huge feather in the cap of the LaserMax Product Development Team.”

To be awarded on one of OpticsPlanet products and brands, OpticsPlanet has aggregated an unprecedented amount of data from sales, customer reviews, feedback from product specialists and experts, forums, and many more resources. The winners of the OpticsPlanet Brilliance Awards highlight the reputation for quality and innovation among the OpticsPlanet spectrum of offerings.

About LaserMax Products

LaserMax Products is a global leader in hardened and miniaturized laser systems, offering a comprehensive line of premium laser sights for home defense, personal protection and training use.
